TEORETICKÁ SPOTREBA

3 – 5 m² / l in a 2 layer system.

NÁVOD NA POUŽITIE

Clean the surface with an appropriate Prochemko façade cleaning agent and allow the surface to dry.

Remove previously applied graffiti remover using Topper or Removex Green.

Spray off with water under high pressure.

Apply B-Wax on a dry surface using a brush, roller, or low-pressure hand spray.

For optimal results with a standard system, apply a second layer crosswise after a two-hour drying time.

Remove graffiti using high-pressure hot water minimally at 80 °C. Then apply the new system.

First apply Prochemko Grease Cleaner Foam to old layers of B-Wax. Then allow it to soak in for a few minutes. Now wipe all of it with a hard brush and remove with a high-pressure cleaner.
