

CHALK-CEMENT-EX CONCENTRATE

Effortlessly removes lime and cement deposits

- Effective action and result
- For acid-resistant surfaces
- Wide range of use
- Can be rinsed off with water

CHALK-CEMENT-EX CONCENTRATE

BESKRIVELSE

For the easy removal of old and hard lime and cement deposits from acid-proof surfaces.
Also suitable for the removal of cement scum.

ANBEFALET BRUG

Chalk-Cement-Ex Concentrate is suitable for removing lime and cement residues from a variety of acid-resistant surfaces. It is also suitable for use as an 'etching agent' for smooth cement-based floors, and so on, and as a descaler for pipes, boilers, etc.

PRAKTISK FORBRUG

Maximum dilution: 1:10. Consumption is heavily dependent on the level of dirt and the desired result.

BRUGSANVISNING

Dilute Chalk-Cement-Ex Concentrate with water to maximally 1:10. In case of vertical surfaces, work from the bottom to the top to avoid runs and streaks. Apply the product using a sponge or hand spray gun and allow to soak in for 5 to 10 minutes. If necessary, use a car-washing brush or white pad as an aid. If the red colour changes into a yellowish white colour before the desired end result is achieved, Chalk-Cementex-Ex must be reapplied. After use, rinse thoroughly with water until a neutral surface is obtained. Chalk-Cement-Ex Concentrate applications, such as in refill spray bottle, dilute in the mixture ration of 150 ml Chalk-Cement-Ex Concentrate to 350 ml clean water. First, try out a test surface.

ANVENDELSESBETINGELSER

Minimum ambient temperature: 5 °C

Maximum relative humidity: 100%

Minimum surface temperature: 5 °C

Maximum surface temperature: 35 °C

RENGØRING AF UDSTYR/SPILD

Rinse with clean water immediately after use.

BEMÆRKninger

Dispose of remnants of the product and empty packaging as chemical waste, in accordance with the local regulations and legal requirements.

PH

1

HOLDBARHED

Can be kept for a minimum of 12 months when stored in a dry, cool, and frost-free environment in the original unopened packaging.
