We advise carrying out a test before commencing activity in order to assess the right consumption level.

NÁVOD NA POUŽITIE

The surfaces to be treated need to be free of dust and grease. Prevosil® Special PI does not fill gaps; any pointing in poor condition should be repaired beforehand. Any silted surfaces should first be treated with Prevosil® CE. Application in two layers wet in wet, taking account of the surface's absorbency, and apply from bottom to top. During application, protect material in the vicinity, such as window frames, windows and plants. Apply Prevosil® Special PL using the flow-coat system (low pressure avoiding mist formation).
